

Pumping a wide range of fluids up to 1000 bar hydraulic pressure

Enerpac's new range of multifluid pumps offer unbeatable corrosion resistance – ideal for testing and filling applications with a wide range of fluids such as demineralised water, oil/water emulsions, waterglycols, mineral oils and skydrol.

Multifluid Hand Pumps

▼ MP-110

- Standard supplied with Nitrile seals – can be used for a wide range of fluids such as demineralised water, oil/water emulsions, waterglycols, mineral oils
- Two speed pumps up to 1000 bar pressure
- Buna Nitrile seals can be exchanged with optional EPDM seal for use with Skydrol or brake fluids
- Impregnated aluminium anodized pump housing with stainless steel internal pumping components
- Externally adjustable pressure relief valve
- Internal pressure release valve for overload protection (pump safety valve).

Pump Type	Maximum Operating Pressure (bar)	Model Number *	Low Pressure Stage (bar)	Displacement/Stroke		Handle Effort (kg)
				at low pressure (cm ³)	at max. pressure (cm ³)	
Two speed	110	MP-110	35	52,6	21,8	45
	350	MP-350	35	52,6	7,8	45
	700	MP-700	35	52,6	3,1	45
	1000	MP-1000	35	52,6	2,2	45

* Pump includes 1,5 mm thick gasket for reservoir mounting.
Pump weight is 6,6 kg.

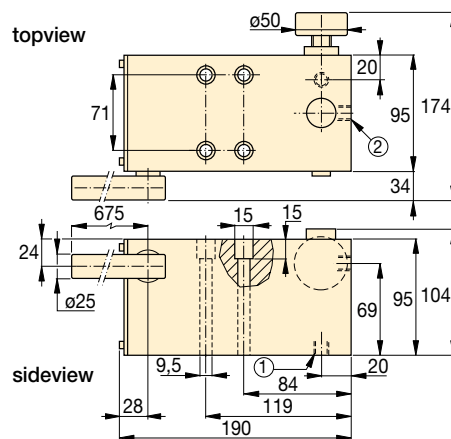

Typical Applications

- Filling and testing of aircraft systems such as shock absorbers;
- Testing of aircraft systems using Skydrol fluid;
- Testing of pressure vessels;
- Operation of single-acting hydraulic tools and cylinders.

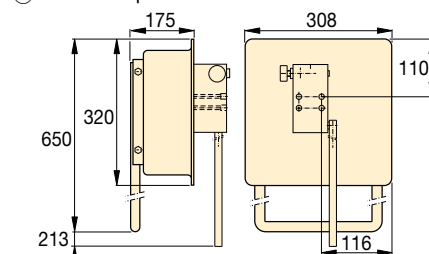

Optional Reservoir Kit

The 10 litres reservoir kit **MP-10T** includes tank with skid frame, top plate with reservoir seal, suction pipe and mounting bolts. Usable oil capacity is 7,4 litres.

MP-110, MP-350, MP-700, MP-1000

- ① Suction / Tank return port 3/8"-18NPT
- ② Pressure port 3/8"-18NPT

MP-10T
